Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 4-6 are objected to because of the following informalities: in each claim, "defined a plurality of protrusions" does not appear to be correct. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Holes et al. US #3,669,555.

4. Holes teaches a photo album including a plurality of mounting sheets 13 and interleaves 21 therebetween. Each mounting sheet includes adhesive 20 positioned only where the photographs will be placed. Part of the adhesive is considered to be a pollutant hiding portion.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3611

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Holes et al.

7. Holes et al. do not particularly describe the color of the adhesive, however, colored adhesive is well known in the art. The examiner takes official notice of colored adhesive and colored glue. It would have been obvious to a person having ordinary skill in the art to utilize the particular adhesive most suited to the album page.

8. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holes et al. in view of Newman, US #3,280,493.

9. Holes et al. do not teach protrusions on the interleaves, however, protrusions are well known in the art. Newman teaches an interleaf and an adhesive. Protrusions 16 prevent the adhesive from holding too tightly. It would have been obvious to apply such protrusion to the interleaves of Holes et al. so as to provide a means for more easily removing the interleaves.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 6067738, 3642552, 3386199, 3720130, 1858405 are cited as of interest.
